TECH ART RECORD

PUBLISHED BY THE STUDENTS' ASSOCIATION OF THE

1962

SOUTHERN ALBERTA INSTITUTE OF TECHNOLOGY

DEDICATION

Technological education in this province will enter a new era when the Northern Alberta Institute of Technology in Edmonton opens its doors sometime during the 1962-63 term. We welcome N.A.I.T. to Alberta's expanding community of learning institutions, and trust that side by side we shall keep Alberta in the vanguard of Canada's energetic program of technical education.

To the future of the Northern Alberta Institute of Technology and its graduates, to the dedicated men and women who will comprise its administrative and instructional staffs, we dedicate this 35th edition of the Tech Art Record.

A MESSAGE TO THE
STUDENTS FROM
Hon. A. O. Aalborg
Minister of Education

To the Student Body of the Southern Alberta Institute of Technology

In this age of breath-taking advance in science and technology everyone needs more and better education in a greater and greater variety of fields.

Not only do we require more well-trained professional people such as doctors, lawyers, dentists and teachers, but we also require more men and women who are highly skilled in various trades and vocations. Thirty years ago a Grade VIII education was considered adequate for most people. Today a Grade XII education is usually not enough. The need for a university education or further education along technical lines beyond high school is increasing rapidly, and facilities for such training are being provided on an ever greater scale from year to year. In these times technical training is not regarded as inferior to academic or professional training and is not being shunned by students of good ability. This is a very important and timely development because, as someone has said --

"The society which scorns excellence in plumbing because plumbing is a humble activity, and tolerates shoddiness in philosophy because it is an exalted activity, will have neither good plumbing nor good philosophy. Neither its pipes nor its theories will hold water."

During the next ten years growing numbers of high school students will wish to pursue courses of technical training and should be given every encouragement to do so.

The Editor and members of his staff have devoted much time and careful thought to the preparation and production of this fine Yearbook. It is a faithful record of many notable activities and events in which you have played a part. Preserve it carefully for the future. In days to come its pages will bring back a host of happy memories of the fond dreams, the warm friendships, the ambitions, the hopes and the fears, and the trials and tribulations that you experienced during this year at school.

Andrew C. Kachney

13th AVENUE AND 10th ST. N.W., CALGARY

SOUTHERN ALBERTA INSTITUTE OF TECHNOLOGY

TO THE STUDENTS OF THE CLASS OF '62:

General Thomas "Stonewall" Jackson was accidentally killed by one of his own sentries. His death occurred one night at a very critical time during a battle in the American Civil War. His death was a catastrophe for the Confederate armies and an irreparable loss to General Robert E. Lee. Had Jackson lived, who knows but that the Confederate armies might have won the war. Concerning this tragedy Sir Winston Churchill said, "Thus on small agate points do the balances of the world turn".

Early in the new year personnel officers from various companies will be visiting the Institute to select, from among the graduating students, prospective employees for their companies. The decision reached during your own interview may be favourably or even adversely affected by the interviews immediately preceding and following your own. The applicant ahead of, or behind, you may or may not have personality-plus. The interviewers may have had a sleepless night on the plane. A number of other factors may affect the result of your interview. These may appear at the time to be trivial matters but upon the result may well depend the manner in which you will spend the remainder of your life. It may mean the difference between an appointment in Alberta and in Eastern Canada. Perhaps between Toronto and Montreal or between Edmonton and Chalk River. Who knows? Your life and that of the wife and family which may one day be your's may very well be affected by the decision made at this interview.

Whatever decisions may be reached, it is my hope that you will have learned, as a result of your attendance at the Institute, to continue to learn as you go out into the world of industry and that you will develop your abilities to the full, not only to your own satisfaction but also to the satisfaction of whoever employs you. Our best wishes for success go with you.

IN MEMORIAM

It is with deep regret that we record the death, on July 5, 1961, of Miss Betty Code, the Principal's Secretary. Miss Code died unexpectedly of a cerebral hemorrhage whilst vacationing in Colorado. She was first appointed to the Institute staff as Principal's Secretary in May 1953. She served faithfully and conscientiously. She was willing and cheerful and was always ready to assist those who needed her services whether in the line of duty or beyond. She was loved by her colleagues and respected by all her associates. We deeply regret her passing and trust that her exemplary life will serve as an inspiration to us all.

The editorial staff of the Tech Art Record is justifiably proud of this 1962 edition. It must certainly rank as one of the finest yet published. Although the basic format has been retained, several improvements have been introduced. The elimination of blank pages, the generous use of spot drawings, and a more graphic presentation of candid photos are among the more important innovations. Once again the printed word has been minimized.

The art work, more so than any other single feature, gives the Tech Art Record its individual identity. This year we have been most fortunate in having A.C.A. students Milt Fredlund and Hugh Laurie as Art Editor and Assistant Art Editor respectively. Milt designed the cover and the divider pages, while Hugh produced the some one hundred spot drawings that make the book a living thing.

The events of the school year have been well recorded. For this we must recognize the efforts of Photo Editor Otto Donadt and his staff, and the wonderful cooperation of the Emery Weal Staff.

We sincerely hope that this book will in future years bring back fond memories of the 1961-62 year at S.A.I.T.

IN MEMORIAM

It is with deep regret that we record the accidental death, on November 14th, of Robert John Oulton, 19, of Nanton, Alberta. John was critically wounded when a gun in the hands of a hunting companion accidentally discharged.

The son of Mr. and Mrs. Robert Oulton, John took his schooling in the Nanton area, prior to enrolling as a Welding student at the Southern Alberta Institute of Technology. His interests centered particularly on curling and fishing.

John is survived by his parents, two brothers, and his grandparents.

THE CALGARY HERALD

"Serving Southern Alberta since 1883"

Including News - Local, National or International -
Sports, Fashions, Entertainment, Science, Politics
and feature articles.

CITY OF CALGARY

Automation has brought a new problem into our already hectic and changing lives. It is necessary that we tackle this problem with intelligence.

Progressive education is required to meet the new challenge. Our Provincial Government has realized that drastic changes are taking place in our daily lives and have geared the Southern Alberta Institute of Technology to offer specialized courses.

Students of the "Tech" are able to avail themselves to this new training and if they take advantage of this sound technical education and follow it through with zeal they are assured of a bright future.

H. W. HAYS, Mayor of Calgary.
